Ten years ago, few libraries had business plans. Today, more and more libraries are required to write them, or they do so because business plans help clarify goals, set reasonable time frames, articulate standards, measure performance, and announce a library's successes. Chock-full of templates, worksheets, case studies, and samples from a wide variety of libraries, big and small, this how-to guide will help you create your business plan quickly and efficiently, saving you time, money, and frustration. One of the forerunners in library business plan development and a popular workshop leader, Harriman guides you through every step of the process, beginning with the whys and wherefores of writing a plan and the function of each component--from the cover page to the appendix and everything in-between. Thirty worksheets will help you pull your plan together, one component at a time. More than twenty sample plans from academic, public, medical, and special libraries worldwide represent best practices. What's more, all of the templates, worksheets, and samples are reproduced on a companion CD-ROM so you can get started now. This is the only reference you need to take your business plan from concept to completion efficiently, effectively, and without reinventing the wheel.

As more associations struggle with limited professional development funding, the opportunities for library and information experts to advance their skills are being examined in a more effective and cost-efficient manner. Revolutionizing the Development of Library and Information Professionals: Planning for the Future examines the future of library professional development by investigating the aspects that make these development events worthwhile. This book is essential for library association personnel, educational institutions, and management personnel in large library systems to aid in determining future trends in professional development opportunities for their staff.

Risk management practices are growing both in number and complexity in businesses, notably driven by new regulatory standards that feature risk management at their core. Although large businesses are more likely to adopt a formal, holistic approach to risk management, the stakes are just as high for SMEs. Risk management in SMEs can contribute to a certain organizational, entrepreneurial and partnership dynamic which constitutes a real opportunity to evolve practices and improve performance. This book offers varied responses to this question by combining conceptual approaches, empirical illustrations and the associated managerial implications.

This text uses a case-based approach to share knowledge and techniques on how to operationalize much of the theoretical underpinnings of hospital quality and safety. Written and edited by leaders in healthcare, education, and engineering, these 22 chapters provide insights as to where the field of improvement and safety science is with regards to the views and aspirations of healthcare advocates and patients. Each chapter also includes vignettes to further solidify the theoretical underpinnings and drive home learning. End of chapter commentary by the editors highlight important concepts and connections between various chapters in the text. Patient Safety and Quality Improvement in Healthcare: A Case-Based Approach presents a novel approach towards hospital safety and quality with the goal to help healthcare providers reach zero harm within their organizations.

This volume offers a systematic inter-disciplinary discussion of the issues and assumptions of the corporate responsibility debate. Brummer provides an extensive review of the relevant literature and develops a methodology for treating specific problems of corporate responsibility, illustrating its use in actual practice. The book also proposes a theory of corporate responsibility and legitimacy and examines the relevance of applying methods of study traditionally associated with the humanities to contemporary problems of corporate ethics.

Utopian Designing is a complete guide to planning and implementing a development or redevelopment project, and includes templates, forms, and resources to help planners and others effectively and efficiently move through the process for the best "utopian" result. Sustainability consists of three different key concepts to be addressed: social equity, economics, and ecological/environmental health. It encompasses a wide variety of disciplines and ideas to reshape our actions and our way of thinking. It's important to understand these concepts, so decisions can be made outside the vacuum of city planners. Utopian Designing focuses on the strategic process, from design through implementation for development and redevelopment of an area. It also looks at sustainable principles to help a community thrive into the future; spur the public input process and information gathering options; obtain data evaluation to select the

best project options; secure partnerships, resources, and funding options; and determine implementation strategies to bring a project to fruition. Strategies beyond implementation will ensure your development stays sustainable and meets your needs well into the future. Appendices provide resources and helpful templates to help move through your project's planning and implementation phases.

This White Paper sets out the Government's detailed proposals for the reform of the planning system, in light of the recommendations made by the Barker Review of Land Use Planning (2006, ISBN 9780118404853) and the Eddington Transport Study (2006, ISBN 9780118404877). These proposals are designed to ensure the planning system can meet a number of challenges including: climate change, supporting sustainable economic development, increasing the supply of housing, protecting and enhancing the environment and natural resources, improving local and national infrastructure and maintaining security of energy supply. For the first time, the reforms cover all development consent regimes, including those for major energy, water, transport and waste development, as well as the town and country planning system. The proposals are based on five core principles: i) responsiveness and integration of economic, social and environmental objectives to deliver sustainable development; ii) a planning system which is streamlined efficient and predictable; iii) full and fair opportunities for public consultation and community engagement; iv) transparency and accountability; and v) planning decisions taken at the right level of government, whether national, regional or local.
