

English For Business Communications 8959 Level 2

Offers concise profiles by region and includes information on financing a college education.

The present publication arose from the two-day conference “Learning through Sharing: Open Resources, Open Practices, Open Communication” organised jointly by the EUROCALL Teacher Education and Computer Mediated Communication Special Interest Groups at the University of Bologna (Italy) on 29-30 March 2012. The main objective was to showcase the many ways in which practitioners in different settings are engaging with the concepts of open resources and practices, and to provide ideas for language teachers who might want to dip their toes into the Open Educational Resources/Open Educational Practices world, or experiment further.

In this edited open access book leading scholars from different disciplinary backgrounds wrestle with social science integration opportunities and challenges. This book explores the growing concern of how best to achieve effective integration of the social science disciplines as a means for furthering natural resource social science and environmental problem solving. The chapters provide an overview of the history, vision, advances, examples and methods that could lead to integration. The quest for integration among the social sciences is not new. Some argue that the social sciences have lagged in their advancements and contributions to society due to their inability to address integration related issues. Integration merits debate for a number of reasons. First, natural resource issues are complex and are affected by multiple proximate driving social factors. Single disciplinary studies focused at one level are unlikely to provide explanations that represent this complexity and are limited in their ability to inform policy recommendations. Complex problems are best explored across disciplines that examine social-ecological phenomenon from different scales. Second, multi-disciplinary initiatives such as those with physical and biological scientists are necessary to understand the scope of the social sciences. Too frequently there is a belief that one social scientist on a multi-disciplinary team provides adequate social science representation. Third, more complete models of human behavior will be achieved through a synthesis of diverse social science perspectives.

As digital reading has become more productive and active, the lines between reading and writing become more blurred. This book offers both an exploration of collaborative reading and pedagogical strategies for teaching reading and writing that reflect the realities of digital literacies. This edited scholarly collection offers strategies for teaching reading and writing that highlight the possibilities, opportunities, and complexities of digital literacies. Part 1 explores reading and writing that happen digitally and offers frameworks for thinking about this process. Part 2 focuses on strategies for the classroom by applying reading theories, design principles, and rhetorical concepts to instruction. Part 3 introduces various disciplinary implications for this blended approach to writing instruction. What is emerging is new theories and practices of reading in both print and digital spaces—theories that account for how diverse student readers encounter and engage digital texts. This collection contributes to this work by offering strategies for sustaining reading and cultivating writing in this landscape of changing digital literacies. The book is essential for the professional development of beginning teachers, who will appreciate the historical and bibliographic overview as well as classroom strategies, and for busy veteran teachers, who will gain updated knowledge and a renewed commitment to teaching an array of literacy skills. It will be ideal for graduate seminars in composition theory and pedagogy, both undergraduate and graduate; and teacher education courses, and will be key reading for scholars in rhetoric and composition interested in composition history, assessment, communication studies, and literature pedagogy.

This comprehensive collection of 38 cases selected from Ivey Publishing helps students understand the complex issues that marketing professionals deal with on a regular basis. The cases were chosen to help students apply conceptual, strategic thinking to issues in marketing management, as well as provide them with more practical operational ideas and methods. Cases were chosen from around the world, from small and large corporations, and include household names such as Twitter, Best Buy, Ruth's Chris, and Kraft Foods. The majority of the cases are very recent (from 2009 or later). Each chapter begins with an introductory review of the topic area prior to the set of cases, and questions are included after each case to help students to think critically about the material. Cases in Marketing Management is edited by Kenneth E. Clow and Donald Baack, and follows the structure and goals of their textbook Marketing Management: A Customer-Oriented Approach. It can also be used as a stand-alone text, or as a supplement to any other marketing management textbook, for instructors who want to more clearly connect theory and practice to actual cases. Offers a quick and easy approach to finding up-to-date contact information for political, government, media, judicial, and legislative leaders for each country of the world. Blending Faber's firsthand experiences in the study and implementation of change with theoretical discussions of identity, agency, structure, and resistance within contexts of change, *Community Action and Organizational Change* is among the first such communications studies to profile a scholar who is also a full participant in the projects. Drawing on theories of Michael Foucault, Anthony Giddens, and Pierre Bourdieu, Faber notes that in contexts of change, the usual oppositions between structure and agency, complicity and resistance, even fiction and nonfiction no longer hold. Instead, change takes place in the realm of narrative, in the stories people tell.

Considering the social processes that drove the information explosion of the 1600s, this is an account of the conversion of the public from an object of state

surveillance into a subject of self-knowledge. It shows that public texts projected a national collectivity characterized by access to markets, mobility, sociability, and self-fashioning.
