When Herman Daley's *Steady-State Economics* was first published in 1977, he caused a sensation with this then-radical view that "enough is best." Today, his ideas are recognized as the key to sustainable development, and *Steady-State Economics* is universally acknowledged as the leading book on the economics of sustainability. The book is a controversial treatise on the economics of global sustainability, which explains how to integrate ecological and economic concerns. The text has been revised and updated since the first edition was published in 1977, in order to include new essays and to take account of recent developments.

Whilst most books look at the political response to terror, this unique book takes an economic approach and includes contributions from Todd Sandler, Sanjay Jain, Andrew Chen, Valpy Fitzgerald and Dennis Mueller. Research in the field of terrorism has increased dramatically since 9/11, responding to the sudden need by policy makers, journalists and the general public to understand terrorism. A unique feature of this field of research is that it expands beyond typical academic categories such as macroeconomics, development studies, international relations or peace science, instead, a range of analysts have applied their various skills of different sub-disciplines to a common theme since 9/11, providing inter-disciplinary insights characterized by a clear focus.

*Microeconomics for Public Managers* presents a rigorous non-mathematical introduction to the study of microeconomics geared towards managers of nonprofit institutions. Provides an introduction to the economist's toolkit for students destined for not-for-profit enterprises and public institutions Topics are selected for their relevance to the non-profit sector, enabling key issues to be covered in greater depth than standard microeconomic textbooks Pertinent case studies and cost-benefit analysis are utilized throughout Features end-of chapter problem sets and study questions Describes economic decision-making applicable to non-profit managers Accompanying website with instructor materials is available at [www.blackwellpublishing.com/keating](http://www.blackwellpublishing.com/keating)

The *World Economic Outlook*, published twice a year in English, French, Spanish, and Arabic, presents IMF staff economists' analyses of global economic developments during the near and medium term. Chapters give an overview of the world economy; consider issues affecting industrial countries, and economics in transition to market; and address topics of pressing current interest. Annexes, boxes, charts, and an extensive statistical appendix augment the text.

In this updated fourth edition, author Maurice Levi successfully integrates both the micro and macro aspects of international finance. He successfully explores managerial issues and focuses on problems arising from financial trading relations between nations, whilst covering key topics such as: \* organization of foreign exchange markets \* determination of exchange rates \* the fundamental principles of international finance \* foreign exchange risk and exposure \* fixed and flexible exchange rates. This impressive new edition builds and improves upon the popular style and structure of the original. With new data, improved pedagogy, and coverage of all of the main developments in international finance over the last few years, this book will prove essential reading for students of economics and business.

Reviews Canada's post-war history and recounts how Canadians strove for prosperity, international respectability, and a more vigorous national culture.

This book collects together the basic documents of an approach to the theory and policy of the balance of payments developed in the 1970s. The approach marked a return to the historical traditions of international monetary theory after some thirty years of departure from them – a departure occasioned by the international collapse of the 1930s, the Keynesian Revolution and a long period of war and post-war reconstruction in which the international monetary system was fragmented by exchange controls, currency inconvertibility and controls over international trade and capital movements.

Some 18 essays by American institutional economist Klein (Pennsylvania State U.), written over the last two decades, are grouped under five major heads: institutionalism--a basic perspective; institutionalism and concentrated power; the role of the public sector; applied institutional economics; and the obligation of the economist. Between 1951 and 1962 nearly ten billion dollars in long-term capital (both direct investment and purchase of securities) flowed into Canada. This massive amount represented one third of all long-term capital moving among industrial nations. Its transfer marked the first time since before World War I that the world witnessed such a large-scale international movement of capital motivated primarily by a prospect of higher rates of return. In *Capital Transfers and Economic Policy* the authors test the theory of the causes and effects of international capital movements against the evidence drawn from Canada's experience. They explore Canada's adjustment to capital flows and show how the operation of her economic policy is affected by the sensitivity of capital flows to the country's interest rates and foreign-exchange rate. Their brilliant analysis is particularly valuable in light of current trends in capital flows among industrial nations and the June 1970 return of the Canadian dollar to a flexible exchange rate, which put the economy in a working situation similar to that of the fifties.

This work is based upon the concept that the optimum strategy for electronics testing can only be established after a detailed economic analysis of the alternatives. The first seven chapters deal with issues that have to be considered when making decisions about testing, including the key roles of quality and time-to-market in today's industrial companies. Chapter eight describes the analytical approaches that can be used to make these decisions, while the remaining four chapters deal with the post-decision activities, such as the evaluation of commercial testers, the financial justification and the presentation to senior management of the proposals.
